

English+ GRAMMAR

**Used by over 2 million students worldwide
Localized into 27 languages, used in 43 countries**

A revolutionary, computer-based interactive multimedia course that makes it fast, fun and easy to learn English as a second or foreign language. It represents the cutting edge of language learning software technology, combining high-resolution color graphics, animation and video, text, digitized voice, music and speech recognition. For ages 12-adult.

English+ Grammar is an internet-enabled multimedia language learning program, which concentrates specifically on grammatical structures - from the present-simple to the most advanced tenses.

With **English+ Grammar**, students are the creators of their own learning paths. At the click of a mouse, students can choose to explore grammatical structures, see animated examples, practice language structures, play a game or test their knowledge.

English+ Grammar also includes sections dealing with common errors and the integration of grammatical structures.

The program gives the student extensive practice in using the English language in real-life situations while detailed review exercises enable students to test their newly acquired English language skills.

English+ Grammar:

- Covers all the grammatical structures through exposure and practice of integrated exercises
- Helps you prepare for exams at all levels

English+ Grammar:

- Gives the student exclusive access to a website full of interesting and enriching activities for English learning
- Lets the student join the Web Pals Club and communicate with other users from all over the world

English+ Grammar: Interactive multimedia software which provides users with:

- High-resolution animated illustrations of the grammatical structures
- Contextualized examples with detailed explanations
- Extensive practice
- Tests and quizzes
- Grammatical Tic-Tac-Toe games
- Mixed-structure review exercises approximating real-life language

Additional Features:

- On-line native language help
- Student's records keep track of progress
